

Designated Assessment Area

The Community Reinvestment Act (CRA) requires that financial institutions identify and list specific census tracts to be designated as the bank's "assessment area" (*geographies where the bank will primarily do business*). Census tracts are statistical subdivisions of a county based on U.S. Census Bureau guidelines.

The following is a list of census tract numbers that comprise the Designated Assessment Area of the Bank of Bartlett. The Bank's assessment area includes all of Shelby County, Tennessee, which is comprised of 249 census tracts. There are 51 Low income tracts, 67 moderate income tracts, 49 Middle income tracts, 70 upper income census tracts and 12 unknown tracts. *Shelby County is part of the Memphis TN-AR-MS MSA.*

Unknown	Low		Moderate		Middle	Upper
